Ethical Issues in Physics  
Bibliography assembled by  
Marshall Thomsen  
Eastern Michigan University  
February 2012  
Under-represented Groups

UND

Physics Today – November 2011

Volume 64, Issue 11, p. 49

Problems with *problem sets*

James Trefil and Sarah Swartz

The authors look at textbook problems in physics that seem to rely on prior knowledge, and argue that this may lead to a different experience with the problems for male and female students.

UND

Physics Today – March 2011

Volume 64, Issue 3, p. 30

For underrepresented minorities, bridge programs ease transition to PhD studies

Jermev N. A. Matthews

The article reports on a partnership between two universities that has resulted in a significant increase in the number of underrepresented minorities pursuing a Ph.D. in physics.

UND

Physics Today—September 2010

Volume 63, Issue 9, pp. 55–56

The Science on Women and Science

Christina Hoff Sommers; Amy L. R. Bug, Reviewer

Book Review

UND

Physics Today—June 2010

Volume 63, Issue 6, pp. 26

US minority faculty numbers still low

Toni Feder

Brief discussion of results from the 2008 AIP survey.

UND

Physics Today—June 2010

Volume 63, Issue 6, pp. 47–48

Undergraduate physics programs at HBCUs: Can we stop the losses?

Quinton L. Williams

An opinion piece discussing the role of historically black universities in providing minority graduate students for physics Ph.D. programs and the importance of promoting diversity in the field of physics.

APS Forum on Physics and Society Newsletter

Volume 38, Number 3 July 2009

Women in the Sciences

Meg Urry

The author reviews studies that indicate there is a real gender bias in our culture related to issues of relevance to women in science. She suggests several approaches to deal with this bias as a way of increasing the number of women in physics.

UND

Science and Engineering Ethics

Volume 14, Number 3 / September, 2008, pp. 345-356

Gender Issues in US Science and Technology Policy: Equality of What?

Susan E. Cozzens

The author argues that while some progress has been made on gender equity issues, there are still significant areas where men and women are not being treated equally in science.

UND

Science and Engineering Ethics

Volume 14, Number 2 / June, 2008, pp. 279-290

On Enrolling More Female Students in Science and Engineering

Mathieu Bouville

The author argues that efforts to recruit more women into engineering and the physical sciences are based on incorrect assumptions. We should not recruit women but rather let them enter if that is where their interest lies.

Science and Engineering Ethics

Volume 14, Number 1 / March, 2008, pp. 51-63

Is Diversity Good? Six Possible Conceptions of Diversity and Six Possible Answers

Mathieu Bouville

The author points out that a discussion of diversity should begin with a common understanding of what is meant by “diversity,” and reaching that understanding is not as trivial as it might seem. The discussion is then put in the context of gender equity in engineering.

Science and Engineering Ethics

Volume 15, Number 1 / March, 2009, pp. 7-10

Underrepresentation in the Real World

Daryl E. Chubin

Diversity in Physics  
Shirley M. Malcom

The author points out that diversity in physics is a greater problem than in related fields (such as chemistry) and that the solution must begin with our approach to science education in the K-12 system.
