## Recommended Citation

Thomsen, Marshall, "Annotated Bibliography of Ethical Issues in Physics: Physics and Society Issues" (2010). *Ethics in Science and Engineering National Clearinghouse*. 390.

<http://scholarworks.umass.edu/esence/390>

This Working Paper is brought to you for free and open access by the Science, Technology and Society Initiative at ScholarWorks@UMass Amherst. It has been accepted for inclusion in Ethics in Science and Engineering National Clearinghouse by an authorized administrator of ScholarWorks@UMass Amherst. For more information, please contact [scholarworks@library.umass.edu](mailto:scholarworks@library.umass.edu).

Ethical Issues in Physics  
Bibliography assembled by  
Marshall Thomsen  
Eastern Michigan University  
February 2012  
Physics and Society Issues (Other)

BEGIN LINK

SOC

Science and Engineering Ethics

Volume 17, Number 4 / December 2011, pp. 723-737

Negotiating Plausibility: Intervening in the Future of Nanotechnology

Cynthia Selin

The author discusses how one can examine the potential societal impact of emergent technologies, using nanotechnology as a case study.

Science and Engineering Ethics

Volume 17, Number 4 / December 2011, pp. 739-742

On Identifying Plausibility and Deliberative Public Policy

Commentary on: "Negotiating Plausibility: Intervening in the Future of Nanotechnology"

René Von Schomberg

In this commentary the author points out that the procedure described in the preceding paper produces not only a more transparent process for evaluating emergent technologies but will also likely produce higher quality decisions.

Science and Engineering Ethics

Volume 17, Number 4 / December 2011, pp. 743-760

Adding to the Mix: Integrating ELSI into a National Nanoscale  
Science and Technology Center

David J. Bjornstad and Amy K. Wolfe

The authors discuss a mechanism for integrating Ethical, Legal and  
Social Issues research into nanomaterials research, arguing that it  
benefits both the materials research program and society at large.

Science and Engineering Ethics

Volume 17, Number 4 / December 2011, pp. 761-767

Nanoethics and the Breaching of Boundaries: A Heuristic for Going  
from Encouragement to a Fuller Integration of Ethical, Legal and  
Social Issues and Science

Commentary on: "Adding to the Mix: Integrating ELSI into a  
National Nanoscale Science and Technology Center"

Julio R. Tuma

The author points out that ELSI research should include an  
investigation of "boundary crossings" related to far reaching effects of  
technology associated with the tendency for some new technologies to  
breach existing boundaries, and to have unpredictable effects that are  
persistent.

SOC

Science and Engineering Ethics

Volume 17, Number 3 / September 2011, pp. 399-409

Scientific Research and the Public Trust

David B. Resnik

The author argues that the concept of "the public trust" needs to be refined  
since the public is not a monolithic entity.

ADV, SOC

APS Forum on Physics and Society Newsletter

Volume 40, Number 3 July 2011

Honesty, Perseverance, and Objectivity: Lessons from a Life in Public Policy

John F. Ahearne

The author draws on examples ranging from accidents in nuclear power plants to his experience with national security issues.

SOC

APS Forum on Physics and Society Newsletter

Science Committee Hearing Spotlights Shortage in Critical Isotope

A discussion of the implications of dwindling supplies of He-3.

SOC

Bulletin of the Atomic Scientists

66.4 (July 2010) pp. 58-69

The security implications of nanotechnology

Margaret Kosal

The author argues that even though the potential for nanotechnology-based chemical and biological weapons is speculative, we nevertheless need to monitor nanotechnology carefully for international security reasons.

SOC

APS Forum on Physics and Society Newsletter

Volume 39, Number 2 April 2010

Communicating Science to the Media

Kathryn Grim

The author provides a tutorial on preparing for an interview with a reporter, addressing several issues related to effective communication between scientists and the public at large.

SOC

Bulletin of the Atomic Scientists

66.2 (March 2010) pp. 1-8

The growing threat of space debris

Samuel Black

The author discusses the origins of space debris, its significance, and mitigation efforts.

SOC

Science and Engineering Ethics

Volume 16, Number 1 / March 2010, pp. 33-41

Why Science cannot be Value-Free

Understanding the Rationality and Responsibility of Science

Agnieszka Lekka-Kowalik

It is argued that scientists must consider the impact their research has or might have on society—these issues are not solely in the realm of the policy makers.

SOC, CLI

APS Forum on Physics and Society Newsletter

Volume 39, Number 1 January 2010

Global Warming: Lessons from Ozone Depletion

Art Hobson

This article provides a concise history of international efforts to control CFC release into the atmosphere and argues the cooperation among interested parties demonstrated in that effort is what is needed to combat greenhouse gases in the context of global climate change.

Physics Today -- December 2009

Volume 62, Issue 12, pp. 28-30

Congressional fellows tackle a range of national issues

Jermey N. A. Matthews

Physics Today reports annually on this program to send physicists and engineers to work with Congress on technical issues.

SOC

Physics Today -- November 2009

Volume 62, Issue 11, pp. 39-44

Human-generated sound and marine mammals

Peter L. Tyack

This article describes research into sound sources (such as noise from commercial ships), how these sounds are perceived by marine mammals, and what impact they have on these mammals.

SOC

Physics Today -- October 2009

Volume 62, Issue 10, pp. 21-23

US government agencies work to minimize damage due to helium-3 shortfall

Toni Feder

Increased demand for helium-3 for applications such as plutonium detectors in use at U. S. borders is making it more challenging to allocate this resource.

SOC

Physics Today -- October 2009

Volume 62, Issue 10, pp. 23-25

As weapons work slows, DOE labs keep busy with research

David Kramer

A news article discussing the current mission at national labs that have historically focused on weapons research.

SOC

APS Forum on Physics and Society Newsletter

Volume 38, Number 4 October 2009

Science as a Model for Rational, Legitimate Government Capable of Meeting Society's Grand Challenges

Lewis M. Branscomb

The author reviews polling data about public reaction to energy related issues to gain insight into what needs to be done in order that science effectively informs policy. He proposes research that is guided towards addressing critical problems but that is evaluated on its quality.

Book Review

BEGIN LINK

SOC

Science and Engineering Ethics

Volume 15, Number 3 / September, 2009, pp. 375-394

The Problems with Forbidding Science

Gary E. Marchant and Lynda L. Pope

The authors argue that restrictions on scientific research are best imposed by scientists themselves: they have a demonstrable interest in maintaining the public trust and they can respond more quickly and effectively to evolving fields of inquiry.

Science and Engineering Ethics

Volume 15, Number 3 / September, 2009, pp. 395-406

Scientific Self-Regulation—So Good, How Can it Fail?

Commentary on “The Problems with Forbidding Science”

Patrick L. Taylor

This commentary on the preceding paper contrasts successful self-regulation of stem cell research to less than successful self regulation in issues related to conflict of interest.

END LINK

## BEGIN LINK

SOC

Science and Engineering Ethics

Volume 15, Number 3 / September, 2009, pp. 351-366

Science, Democracy, and the Right to Research

Mark B. Brown and David H. Guston

This article looks at the definition of “rights” and explores political and legal aspects of the right to research. It notes that society can restrict research in a given area not only by banning it, but also by merely denying support for it.

Science and Engineering Ethics

Volume 15, Number 3 / September, 2009, pp. 367-373

Private Interests Count Too

Commentary on “Science, Democracy, and the Right to Research”

Mark S. Frankel

In his commentary on the above paper, this author points out that scientists must also deal with corporate influences on the direction of research.

SOC

Science and Engineering Ethics

Volume 15, Number 3 / September, 2009, pp. 263-269

Editors’ Overview: Forbidding Science?

Gary E. Marchant and Stephanie J. Bird

An overview of a conference and of this special issue of SEE on the topic of whether certain areas of scientific research should be forbidden.

SOC

Physics Today -- August 2009

Volume 62, Issue 8, pp. 41-42

Encouraging good science on the Web

Alexander Antunes

The author argues that it is important to maintain the quality of information on the web that is being presented as “scientific,” and that there should be an appropriate reward system for scientists working in this area.

SOC

Bulletin of the Atomic Scientists

65.1 (January-February 2009) pp. 56-61

Nanomaterial safety

Scott E. McNeil

The author discusses research on the possible link between nanoparticles and cancer, paying particular attention to a study involving gold nanoparticles and lab rats that indicates the cancer risk may be highly dependent on the type of coating on the particle.
