SYNERGY
An exhibition of paintings and prints by artist Alicia Hunsicker ’93
February 5 through June 2, 2016
Science and Engineering Library
Lederle Graduate Research Center Lowrise, Floor 2

In the exhibition, SYNERGY, Alicia Hunsicker investigates the powerful combination of art and science to produce creations greater than the sum of their separate parts.

With science as a point of departure, Hunsicker paints vibrant swirling organisms that reveal a cosmic discussion about the nature of all things.

Rather than depict microscopic particles or cosmic bodies with pure scientific objectivity, Hunsicker’s images are infused with a life force of joyful exuberance.

RECEPTION
Thursday, April 21, 2016, 4-6 p.m.
Science and Engineering Library
Lederle Lowrise, Floor 2
More info: 413-545-1370
OPEN TO THE PUBLIC

Artist Alicia Hunsicker works from her home studio in Leyden, Massachusetts. Deeply connected to nature and interested in human consciousness, she is inspired by both science and spirituality. She has shown locally, nationally, and internationally and has been awarded numerous grants, awards, and residencies for her work.
