OCCASIONAL WORKING PAPERS

in

COGNITIVE SCIENCE

May, 1982

Edited by:

Alan Prince
Steven Weisler
Dept. of Linguistics
Univ. of Massachusetts
Amherst, MA 01003

CONTENTS:

	page
Automatic Activation in Semantic and Episodic Memory: Implications for the Utility of Conscious Awareness	
David A. Balota	1
Rate and Style in Accelerated Speech	
Shmuel Bolozky	48
Computational Neurolinguistics	
Helen Gigley	77
Montague's Intensional Logic and the Theory of Types	
Raymond Turner	97
Coordination and the Syntax of <u>that</u> -clauses	
Steven Weisler	113
The Spedificational Pseudocleft	
Edwin Williams	135

INTRODUCTION

The papers in this volume represent some of the fruits of labor in Cognitive Science at the University of Massachusetts. As the diversity of the contents indicates, our work has explored several avenues of research.

Many of the articles draw on and extend results forged in the disciplines which collectively comprise Cognitive Science. The great promise of this line of inquiry is to encourage interdisciplinary perspectives on traditional problems as well as to identify new and fertile domains of research. Certainly the issues highlighted in these papers will continue to draw their share of attention as the drama unfolds.

For help in preparing this volume we are grateful to Peter Sells. We also acknowledge the financial support of A. P. Sloan Foundation grant #80-6-13 to the University of Massachusetts.

Alan Prince and Steve Weisler
