Preface: SCiL 2023 Editors’ Note

Tim Hunter¹ and Brandon Prickett²
¹University of California, Los Angeles, ²University of Massachusetts Amherst

This volume contains research presented at the sixth annual meeting of the Society for Computation in Linguistics (SCiL), held in Amherst, Massachusetts, June 15–17, 2023.

Research was submitted to be reviewed either in the form of a paper, or as an abstract. The oral presentations, or talks, at the conference included both papers and abstracts. Authors of accepted abstracts were given the option of publishing an extended version; these are included with the papers in this volume.

In total, we received 68 submissions to the conference, 28 abstracts and 40 papers. 19 submissions were selected for oral presentation (~28%) and 30 for poster presentation (~44%).

We thank our reviewers for their indispensable help in selecting the research for presentation at the conference:

Thanks also to Joe Pater and Steve Bischof for logistical help.

SCiL 2023 also included invited talks by Jane Chandlee (Haverford College), Brendan O’Connor (University of Massachusetts Amherst), and Emily Morgan (University of California, Davis). Further information can be found at our website: https://blogs.umass.edu/scil/.
