

LIST OF FIGURES

Figure	Page
1.1 Schematic of the Zoller PVT	4
1.2 Schematic of the McKenna PVT	6
1.3 Simplified Schematic of the BFCF-PVT Design Principle	9
1.4 Chemical Structure of 1-Ethyl-3-Methylimidazolium Ethyl Sulfate.....	10
1.5 Instrument Diagram of the BFCF-PVT	13
1.6 The Two BFCF-PVT's Which Have Been Built	14
1.7 Tubing Helices	17
1.8 Schematic of the Custom Sample Reactor.....	20
1.9 Instrument Diagram of the BFCF-PVT with Valve Labeling	21
1.10 Schematic of the Sample Reactor Assembly	22
1.11 Additional Sample Confinement Strategies for the BFCF-PVT.....	27
1.12 Subtracting the Volume Zero Point from the Total Dataset	32
1.13 Quadratic Fit and Calculated Residuals of the Quadratic Fit	34
1.14 Quadratic Calibration and Quadratic Calibration with Residual Component	35
1.15 PVT Comparison for Poly(hexafluoropropylene oxide).....	41
1.16 PVT Comparison for Polystyrene.....	42
1.17 PVT Comparison for Polypropylene	44
1.18 PVT Comparison for Polyethylene.....	46
1.19 Testing Protocol PVT Comparison for Polystyrene	48

2.1 Schematic Plot Illustrating the Glass Transition.....	58
2.2 Schematic Illustration of Densification During Aging	61
2.3 Schematic of the Response of a Physically Aged Glass	62
2.4 Thermal Characterization of a Physically Aged Glass	64
2.5 Mechanical Characterization of a Physically Aged Glass	65
2.6 PVT Space for Physical Aging	66
2.7 Temperature and Pressure Profiles for the Ultra-High Pressure Conditioning	72
2.8 Temperature and Pressure Profiles for the Characterize-Condition- Characterize PVT Test.....	74
2.9 DMA Characterization of the Beta Transition.....	76
2.10 D230 Thermal Analysis Results for Thermal Annealing	78
2.11 5-2-3 Thermal Analysis Results for Thermal Annealing.....	78
2.12 5-4-1 Thermal Analysis Results for Thermal Annealing.....	78
2.13 T_f Calculations for the Three Epoxies	81
2.14 Normalized Plots of T_g and T_f	83
2.15 Thermal Analysis Results for Pressure Conditioning.....	85
2.16 Low Strain Regime Compression Curves.....	91
2.17 σ_y versus T_g	92
2.18 Normalization of the σ_y and the T_g	94
2.19 Dilatometric Results from the Characterize-Condition-Characterize PVT Test	97

3.1 Representative Images Illustrating the Edge Detection Algorithm	115
3.2 Overlaid First and Last Images for Each of the Epoxy Samples	117
3.3 Bulk Characterizations for the Three Epoxies	120
3.4 Isobars for the Three Epoxy Samples Showing the Glass Transition.....	122
3.5 Isotherm Plot of Pressure Versus True Volumetric Strain for the Three Epoxies.....	124
3.6 Bulk Modulus as a Function of Temperature for the Three Epoxies.....	125
3.7 Low Strain Regime Compression Curves for the Three Epoxies	129
3.8 Local Stiffness as a Function of True Strain for the Three Epoxies	129
3.9 Region of Analysis for Evaluating Poisson’s Ratio.....	133
3.10 Schematic of Diameter Expansion and Poisson’s Analysis.....	134
3.11 Engineering Strain Versus Time for the Three Epoxies	135
3.12 Poisson’s Ratio Versus Time for the Three Epoxies	136
3.13 Compression Curves for the Epoxies Not Taken to Ultimate Failure	139
3.14 Representative Images of an Epoxy Sample Before and After Compression	139
3.15 Density Measurements Before and After Compression.....	140
3.16 Recreated Volumes from Compression Images.....	142
3.17 Volume Versus Time and Density Versus Time for the Three Epoxies.....	143
3.18 Overlaid Density and True Stress Versus True Strain for the Three Epoxies	145
