

NOAA/NOS/CO-OPS
Verified Water Level vs. Predicted Plot
8761305 Shell Beach, LA
from 2009/09/10 - 2009/09/15

Figure 3.5. Observed tides often follow the pattern of the predicted tide but may vary due to local weather conditions. In this example, the tides were actually higher than predicted. NOAA website “Tides & Currents” allows you to display the differences between predicted and observed tides for many locations. (Redrawn from NOAA data)
