Emmy Award-winning producer, director, and actor, Michael Haley has had a 40-year career in the film industry, which started in the late ’60s after his graduation from UMass Amherst.

Mike recently donated his papers to the UMass Amherst Libraries. Reflecting a diverse career in film, the Haley collection consists of scripts, photographs, memorabilia, diaries, notes, and correspondence. There are over 100 scripts, from films ranging from the *Godfather II* to *Charlie Wilson’s War* and *Angels in America*.

Mike is currently writing a book about his career in the film industry and lives with his wife of 25 years, Joan, in Conway, Massachusetts.
At social events when people learn I am the Director of Libraries at UMass Amherst, the most frequently asked question is “Why do we need a library since everything is now digitized?”

It is impossible to deny that networked computing has changed libraries, academia, and our society over the past twenty years. Google, Wikipedia, Facebook, and Twitter are just a few examples. The importance of social networking in the recent political unrest in Egypt and other middle eastern countries is further evidence of the global impact networked computing is having.

These changes make libraries more important than ever; with the exponential growth of available information on any given subject, librarians—who have always expertly curated information—are critical to information literacy.

The transition from a print-based environment to one that is increasingly digital, demands that libraries transform themselves. The role of libraries in the print world—collecting, providing access to, and preserving our cultural heritage—does not change as we move into a digital realm. The role of libraries remains the same but we must take on new challenges in determining how to fulfill this role.

As you read the Newsletter, you will get a glimpse of the ongoing efforts being made by staff at your UMass Amherst Libraries to maintain the best traditions of the print-based world while transforming ourselves into a world-class 21st century digital environment. Your financial contributions and your donations of significant collections are essential to our continued success. As always, we are deeply grateful for your support.

Jay Schafer
Director of Libraries

Digital Du Bois

On June 16, the UMass Amherst Libraries officially open Credo, our online repository containing the digital collections of Special Collections and University Archives (SCUA). SCUA presently houses more than 30,000 linear feet of archives and rare books, the vast majority of which are available only to users who are able to visit our collections in person. In an effort to make these unique materials more widely and freely accessible, the Libraries began to develop Credo in 2009, with the goal of making the repository a central hub for exploring SCUA’s collections from anywhere at any time.

With the generous support of the Verizon Foundation and the National Endowment for the Humanities, SCUA embarked upon the massive project of digitizing the complete papers of the African American intellectual and activist, W.E.B. Du Bois. When Credo launches, more than 40,000 digital objects from the Du Bois Papers will be available, with the remaining 60,000 items to follow in the next two years. SCUA will add significant content to Credo in the coming years both digitized and born digital.

The Library has received the first shipment of 500 boxes from IMG (International Management Group), the marketing and management company founded by Mark H. McCormack. This collection encapsulates the founding of the multi-billion dollar, international, sport management industry. Mark McCormack’s clients included professional athletes such as Arnold Palmer, Andre Agassi, and Tiger Woods, as well as entertainers, models, the Olympics, and even the Pope. The amount of material is extraordinary and the Library will be digitizing large portions of it, with the goal of having the material accessible to the public as soon as possible.

“It is a massive collection with massive research potential to understand the evolution of an entire industry of sport and entertainment marketing,” says Rob Cox, head of Special Collections and University Archives.

“McCormack was an innovator and developed industry and business practices and penetrated markets that no one had before,” says Kirstin Kay, sport innovation archivist. “This brings a new set of researchers to campus and it will be the cornerstone of new collecting areas for the library: innovation and entrepreneurship.”

The collection will be integrated into undergraduate and graduate curriculums in sport management, communications, economics, sociology, and women’s studies, drawing partnerships between the Library and other academic units on campus. Several faculty members are interested in publishing a new sport marketing journal through ScholarWorks, the Library’s open access scholarly digital repository.

“This collection offers the most significant documentation of the growth and development of the sport management and marketing industries,” says Lisa Masteralexis, head of the Mark H. McCormack Department of Sport Management.

“We plan to write case studies based on the Collection and use them to teach current and future students, in addition to spearheading other initiatives that will grow out of this.”

Christopher Russell ’10 (far right) won the third annual Undergraduate Research Award for his senior honors thesis “A Tale of Two Cities: How the Government Caused and Maintained Racial Inequality in Oakland, CA 1945-1970.”

Thank you to our 2011 business sponsors

Amherst Books • Brattle Book Shop • EBSCO • Elsevier • Gale, a part of Cengage • Hampden Bank • Marcus Printing • MicroTek, Inc. • OFI Contract Interiors • Print Associates • ProQuest • Rao’s Coffee Roasting Co., Inc. • Taylor Rental • UMass Catering • Wiley-Blackwell

The second annual Emily Silverman Book Collecting Award went to Jonah Vorspan-Stein ’13 (left) for “Contemporary Independent Literature,” a collection of books published by independent publishers since 2009 in the undergraduate category and Nathaniel Otting ’13 (right) for “Walser & Company,” a collection of books by and about Robert Walser, the German-speaking Swiss writer in the graduate category.

Provoast Staros and President of the Friends of the Library Board Dodie Gaudet ’73 present an honorary mention award to Marjorie Connolly ’11 for “Anarchy to Activism: Italian Immigrant Politics During Boston’s Great Molasses Flood.”
**Mapping Hampshire County’s History**

IN APRIL, the Library unveiled a major gift of materials to Special Collections and University Archives, the Hampshire Council of Governments Papers. The collection consists of rare and valuable records dealing with Hampshire County business from as early as 1677. The records include court dockets; road, railroad, and dam construction documents; censuses; maps; and more. Among the many valuable records in the collection is a large folio volume containing maps of roadways drawn by engineers in western Massachusetts more than 200 years ago. The Library plans to digitize much of the collection over the next two years. The collection expands resources for legal studies scholars, genealogists, landscape architects, regional planners, developers and engineers.
