Contents

FORWARD ix
CONTRIBUTING AUTHORS xi
ACKNOWLEDGEMENTS xvii
ABOUT THE EDITORS xxi

PART I: ENVIRONMENTAL FATE

1. MODELING ZINC AND SODIUM CHLORIDE MIGRATION IN VADOSE ZONE SOILS BENEATH STORMWATER INFILTRATION DEVICES
   J.B. MIKULA, S.E. CLARK, AND K.H. BAKER 1

2. FISH-USEFUL BIO-INDICATORS FOR EVALUATION OF CONTAMINATION IN WATER ECOSYSTEMS
   EMAUEL SUCMAN, MILADA VÄVROVÁ, HELENA ZLÁMALOVÁ GARGOŠOVÁ, AND MIROSLAVA MAHROVÁ 17

3. ACHIEVEMENT OF A BENEFICIAL REUSE DESIGNATION FOR A SPECIALIZED HIGH VOLUME BYPRODUCT
   R. MARIE COLEMAN, CHRISTOPHER M. TEAF, VICKIE P. CAVEY, DOUGLAS J. COVERT, SUSAN N. HUGHES, MICHAEL MARCUS, AND MATT MCCLOURE 27
PART II: HEAVY METALS

5. CONTAINING ARSENIC-ENRICHED GROUNDWATER TRACING LEAD ISOTOPIC COMPOSITIONS OF COMMON ARSENICAL PESTICIDES IN A COASTAL MAINE WATERSHED CONTAINING ARSENIC-ENRICHED GROUND WATER
   ROBERT A. AYUSO, NORA K. FOLEY, GILPIN R. ROBINSON JR, ANNA S. COLVIN, GAIL LIPFERT AND ANDREW S. REEVE

6. HEAVY METAL IMMOBILIZATION IN GROUNDWATER BY IN SITU BIOPRECIPITATION: COMMENTS AND QUESTIONS ABOUT EFFICIENCY AND SUSTAINABILITY OF THE PROCESS
   L. DIELS, J. GEETS, W. DEJONGHE, S. VAN ROY, K. VANBROEKBHoven, A. SZEWczyK AND G. MALINA

7. MICROBES AND ARSENIC CONTAMINATION OF GROUNDWATER IN MAINE: IS THERE A LINK?
   JEAN D. MacRAE

8. TREATMENT OF HEAVY METALS IN STORMWATER RUNOFF USING WET POND AND WETLAND MESOCOSMS
   SWARNA MUTHUKRISHNAN

9. COPPER, CHROMIUM AND ARSENIC IN SOIL AND PLANTS NEAR COATED AND UNCOATED CCA WOOD
   DAVID E. STILWELL, CRAIG L. MUSANTE AND BRU L. SAWHNEY

PART III: MTBE

10. MTBE: COVERAGE FOR THIS "SPREADING" PROBLEM
    JOHN N. ELLISON AND JOHN G. NEVIUS
CONTENTS

11. AN ESTIMATE OF THE NATIONAL COST FOR REMEDIATION OF MTBE RELEASES FROM EXISTING LEAKING UNDERGROUND STORAGE TANK SITES
   Frank Sweet, Mark Kauffman, Tabatha Pellerin, David Espy and Michael Mills 173

PART IV: RADIONUCLIDES

12. SUMMER INDOOR RADON EXCEEDS WINTER INDOOR RADON
   Douglas G. Mose, George W. Mushrush, George Saiway 215

13. MEASUREMENT UNCERTAINTY OF ACTIVATED CHARCOAL AND ALPHA-TRACK INDOOR RADON DETECTORS
   George Mushrush, Douglas Mose and Fiorella Simoni 223

PART V: REMEDIATION

14. THE VALUE OF ORGANOCLAYS IN PERMEABLE BARRIERS
   George R. Alther 231

15. SORPTION/DESORPTION OF POLYCHLORINATED DIBENZO-P-DIOXINS AND POLYCHLORINATED DIBENZO FURANS (PCDDs/PCDFs) IN THE PRESENCE OF CYCLODEXTRINS
   S.J. Cathum, A. Dumouchel, C.E. Brown, and M. Punt 243

16. EMERGING SCIENCE SUPPORTING THE 2005 NATIONAL RESEARCH COUNCIL PERCHLORATE RISK ASSESSMENT
   John P. Gibbs 259

17. OVERVIEW OF TWO LARGE-SCALE RESIDENTIAL SUB-SLAB DEPRESSURIZATION SYSTEM INSTALLATION PROGRAMS
   Lucas Hellerich, Erzsebet Pocsi, William Baker, IV, Ronald Curran and Graham Stevens 273
18. ACCUMULATION OF HEAVY METALS BY CUCUMBER AND BRASSICA JUNCEA UNDER DIFFERENT CULTIVATION CONDITIONS
Ryuji Takeda, Yukiko Sato, Rumi Yoshimura, Sadao Komemushi and Akiyoshi Sawabe

PART VI: SEDIMENTS

19. INNOVATIVE SYSTEMS FOR DREDGING, DEWATERING OR FOR IN-SITU CAPPING OF CONTAMINATED SEDIMENTS
James T. Olsta and Jerald W. Darlington

20. EXCAVATION OF PCB-CONTAMINATED SEDIMENT ADJACENT TO THE INTAKE OF A 12-MGD DRINKING WATER PLANT
Bryan R. Maurer

21. USE OF A BENCH-SCALE TREATABILITY STUDY TO DETERMINE COST-EFFECTIVE DISPOSAL METHODS FOR CONTAMINATED SEDIMENTS
M.T Balba, S. Dore, D. Pope, J. Smith, and A.F. Weston

PART IX: SITE ASSESSMENT

22. INL SUBSURFACE WIRELESS SENSOR PLATFORM
Dennis C. Kunerth, John M. Svoboda, and James T. Johnson

23. FIELD INVESTIGATION OF PAHS IN SOILS AROUND NARA CITY IN JAPAN
Ryuji Takeda, Yoshimasa Ikuma, Sadayoshi Matsumoto, Sadao Komemushi and Akiyoshi Sawabe

24. BENEFICIAL USE OF C&D RECOVERED SCREEN MATERIAL IN RESIDENTIAL APPLICATIONS: A CASE STUDY
Brenda S. Clark, Philip T. Medico, Frank J. Bermudez, Myles Clewner, Richard G. Wilkins, R. Marie Coleman, and Christopher M. Teaf

INDEX
Forward

The Annual International Conference on Soils, Sediments and Water, held each year at the University of Massachusetts in Amherst, is one of the longest running conferences of its type in the world. From its beginnings as a focused meeting on petroleum contaminated soils during the mille-1980’s, this conference has grown and broadened remarkably. The most recent iteration, conducted in October, 2005, marked the 21st annual meeting of this well-attended event that annually has drawn 800 to 9,000 participants. At least 40 states and 30 foreign countries have been represented during its history spanning more than two decades. To put this impressive longevity into perspective, recall that Back To The Future was at the movies in 1985, and it is sobering to recall that the first of these sessions followed close on the heels of the Bhopal tragedy in 1984.

One of the principal benefits and ongoing attractions attendant to a meeting such as this one is the opportunity to present, critique, debate and extend the work that we in the environmental field find so overwhelmingly important. Whether in the formal confines of the oral platform presentations, or the more informal dialogue held during the poster sessions, or even in those discussions conducted at dinner, we are reminded that there is always more to learn about how our colleagues and others view what we may take for granted every day. At these meetings, for example, engineers have the opportunity to speak freely to other engineers, to biologists, to geologists, to chemists, to agency representatives, and others in ways that frequently identify opportunities in the most unlikely of places.
Consider the breadth of coverage for the papers in this year’s volume, which range from assessment and remediation of arsenic, dioxins and perchlorate, to the evaluation and correction of indoor radionuclide risks, to the application of several beneficial reuse projects involving valuable industrial byproducts. The broad spectrum of technical specialties and the impressive experience that comes to Amherst with the participants ensures every year a unique and practical blend of science, policy and philosophical views which cannot help but continue to open our eyes to new areas. It is a telling observation that very few participants come to this conference for a single year. Rather, it is much more common to learn of those who have attended repeatedly for many years, often in different professional positions, and with different views as their careers have progressed.

These Proceedings from the 2005 international conference, representing Volume 11 of this series, contain 24 technical papers that showcase the work of 80 different authors. This volume is organized into the following sections: Part I - Environmental Fate; Part II - Heavy Metals; Part III - MTBE; Part IV - Radionuclides; Part V - Remediation; Part VI - Sediments; and, Part VII - Site Assessment. The scientists, regulatory agency personnel, consultants, academicians and others who have prepared the manuscripts in this volume represent a very broad array of interests and technical disciplines that all are essential to responsible and effective environmental evaluation and decision-making. It is a pleasure to have the opportunity to introduce this newest contribution to a long-standing series. The editors, sponsors, and conference staff should be commended for their enthusiastic support and for the consistent quality of this important scientific event.

Acknowledgments

We wish to thank all agencies, organizations and companies that sponsored the conference. Without their generosity and assistance, the conference and this book would not have been possible.

Benefactors

- ENSR International
- Environmental Remediation and Financial Services, LLC
- Massachusetts Department of Environmental Protection

Sponsors

- American Petroleum Institute
- LFR, Inc.
- Regenisis Remediation Products
- Shaw Group

Supporters

An appreciated acknowledgement to **Denise Leonard**, Conference Coordinator, for her time and energy contributed throughout the year to the organization of The Annual International Conference on Soils, Sediment & Water at the University of Massachusetts, Amherst. Also acknowledgement to her assistant, **Holly Dodge**, for her support over the last few years in her contribution to the compilation of this book and other aspects pertaining to the conference.

Thank you to **Rennie Nelson** who has been the Copy Editor since 2003 for the Contaminated Soils Conference Proceedings.
About the Editors

Paul T. Kostecki, Vice Provost for Research Affairs, University of Massachusetts at Amherst and Associate Director, Northeast Regional Environmental Public Health Center, School of Public Health, University of Massachusetts at Amherst, received his Ph.D. from the School of Natural Resources at the University of Michigan in 1980. He has been involved with human and ecological risk assessment and risk management research for the last 13 years. Dr. Kostecki has co-authored and co-edited over 50 articles and 16 books on environmental assessment and cleanup including: Remedial Technologies for Leaking Underground Storage Tanks; Soils Contaminated by Petroleum Products; Petroleum Contaminated Soils, Vols. 1, 2, and 3; Hydrocarbon Contaminated Soils and Groundwater, Vols. 1, 2, 3 and 4; Hydrocarbon Contaminated Soils, Vols. 1, 2, 3, 4 and 5; Principles and Practices for Petroleum Contaminated Soils; Principles and Practices for Diesel Contaminated Soils, Vols. 1, 2, 3, 4 and 5; SESOIL in Environmental Fate and Risk modeling; Contaminated Soils, Vol. 1; and Risk Assessment and Environmental Fate Methodologies. Dr. Kostecki also serves as Associate Editor for the Journal of Soil Contamination, Chairman of the Scientific Advisory Board for Soil and Groundwater Cleanup Magazine, as well as an editorial board member for the journal Human and Ecological Risk Assessment.

Edward J. Calabrese is a board certified toxicologist and professor of toxicology at the University of Massachusetts School of Public Health at Amherst. Dr. Calabrese has researched extensively in the area of host factors affecting susceptibility to pollutants and has authored more than 300
papers in scholarly journals, as well as 24 books, including: Principles of Animal Extrapolation; Nutrition and Environmental Health, Vols. 1 and 2; Ecogenetic: Safe Drinking Water Act: Amendments. Regulations, and Standards; Soils Contaminated by Petroleum: Environmental and Public Health Effects; Petroleum Contaminated Soils, Vols. 1, 2 and 3; Ozone Risk Communication and Management; Hydrocarbon Contaminated Soils, Vols. 1, 2, 3, 4 and 5; Hydrocarbon Contaminated Soils and Groundwater, Vols. 1, 2, 3, and 4; Multiple Chemical Interactions; Air Toxics and Risk Assessment; Alcohol Interactions with Drugs and Chemicals; Regulating Drinking Water Quality; Biological Effects of Low Level Exposures to Chemicals and Radiation; Contaminated Soils; Diesel Fuel Contamination; Risk Assessment and Environmental Fate Methodologies; Principles and Practices for Petroleum Contaminated Soils, Vols. 1, 2, 3, 4, and 5; Contaminated Soils, Vol. 1; and Performing Ecological Risk Assessments. He has been a member of the U.S. National Academy of Sciences and NATO Countries Safe Drinking Water Committees, and the Board of Scientific Counselors for the Agency for Toxic Substances and Disease Registry (ATSDR). Dr. Calabrese also serves as Director of the Northeast Regional Environmental Public Health Center at the University of Massachusetts, Chairman of the BELLE Advisory Committee and Director of the International Hormesis Society.

James Dragun, Ph.D., is a soil chemist with extensive experience dealing with soil remediation. He has addressed the extent, danger, and/or cleanup of chemicals at sites of national and international concern such as the oil lakes caused by the 1991 Persian Gulf War (Kuwait), VX chemical warfare agent for the U.N. Weapons Inspection Program (Iraq), malfunction of the Three Mile Island Nuclear Power Plant USA), and dioxin in Missouri (USA). Twenty-four nations including Japan, Canada, the United Kingdom, Australia, Germany, Switzerland, Italy, France, Spain, Scandinavia, and the Netherlands have utilized his expertise.

He founded and built an environmental engineering-science consulting company. For 18 years, he has led a team of specialists in chemical engineering, civil engineering, environmental engineering, geotechnical engineering, mechanical engineering, physics, plant engineering, environmental science, geology, hydrogeology, chemistry, biochemistry, toxicology, and biology. Dr. Dragun and his associates have solved environmental issues for major companies and governments in six continents (Africa, Asia, Australia, Europe, North America, and South America).

Dr. Dragun is a full Professor at the University of Massachusetts and at Wayne State University, Detroit, MI. He has authored two college textbooks
and co-authored/edited eight technical books. Also, Dr. Dragun has been the Editor-in-Chief of the International Journal of Soil and Sediment Contamination for over 15 years.
